NordNICE Workshop: Informatics Education in Primary and Secondary Schools

Tartu May 22-23, 2017

The goal of this workshop is to highlight, discuss and work with some of the practical aspects of informatics education in primary education. The target audience is both the NordNICE partners and teachers interested in informatics education in primary education. The program includes visits to four schools that have been working with computational thinking and programming with their pupils and presentations of concrete activities aimed mainly at teachers.
