

INFORMATION TECHNOLOGIES IN BASIC (LOWER SECONDARY) SCHOOL

Elektrenai “Ažuolynas” Basic School
Lina Adomavičiūtė

2015-12-11

Changes in IT subject

- in the beginning IT started to be teaching at 9th, but now at 5th class
- Increase of numbers of computers in classes

Computers nowadays can be found in

- ⦿ School library
- ⦿ IT reading-room
- ⦿ Classrooms of other subjects

Students experience in using IT

- At the start of my work at “Ažuolynas” school students were afraid of computers
- Nowadays students have a lot of experience how to use computers

Students' use of computers at home

- ⦿ Communication in social networks
- ⦿ Games
- ⦿ Search for information

Conclusions

- In recent decade students attitudes to IT have changed
- Wider access for students to computers and the internet
- Not just IT teachers use information technologies in their classes

Teacher, teaching IT, should:

- ④ summarize already existing experience students;
- ④ encourage students to use correct IT terminology;
- ④ develop students' information culture;
- ④ encourage students to think critically;
- ④ teach students to collaborate.

Methods that I use in my classes

- ④ The Individual work
- ④ Group work
- ④ Projects works
- ④ Discussion
- ④ Elements of distant learning

Projects in 5–7 grades

- ◎ “Book”
- ◎ “Announcement”
- ◎ “Booklet”
- ◎ “Presentation”
- ◎ Projects integrated with different subjects

Thank you for your attention
