

ICT use in Our primary lessons

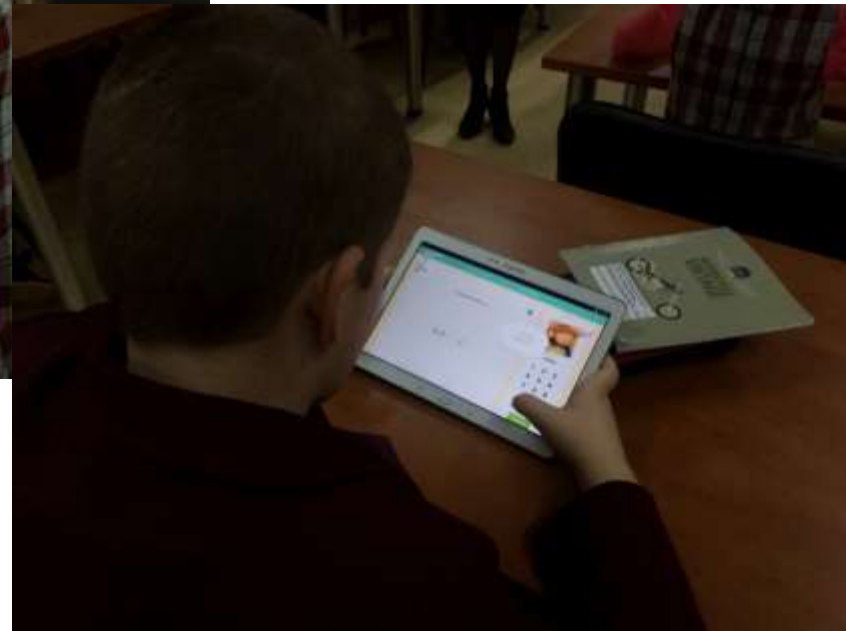

Daiva Remeikienė primary teacher

Gediminas Jonauskas ICT teacher

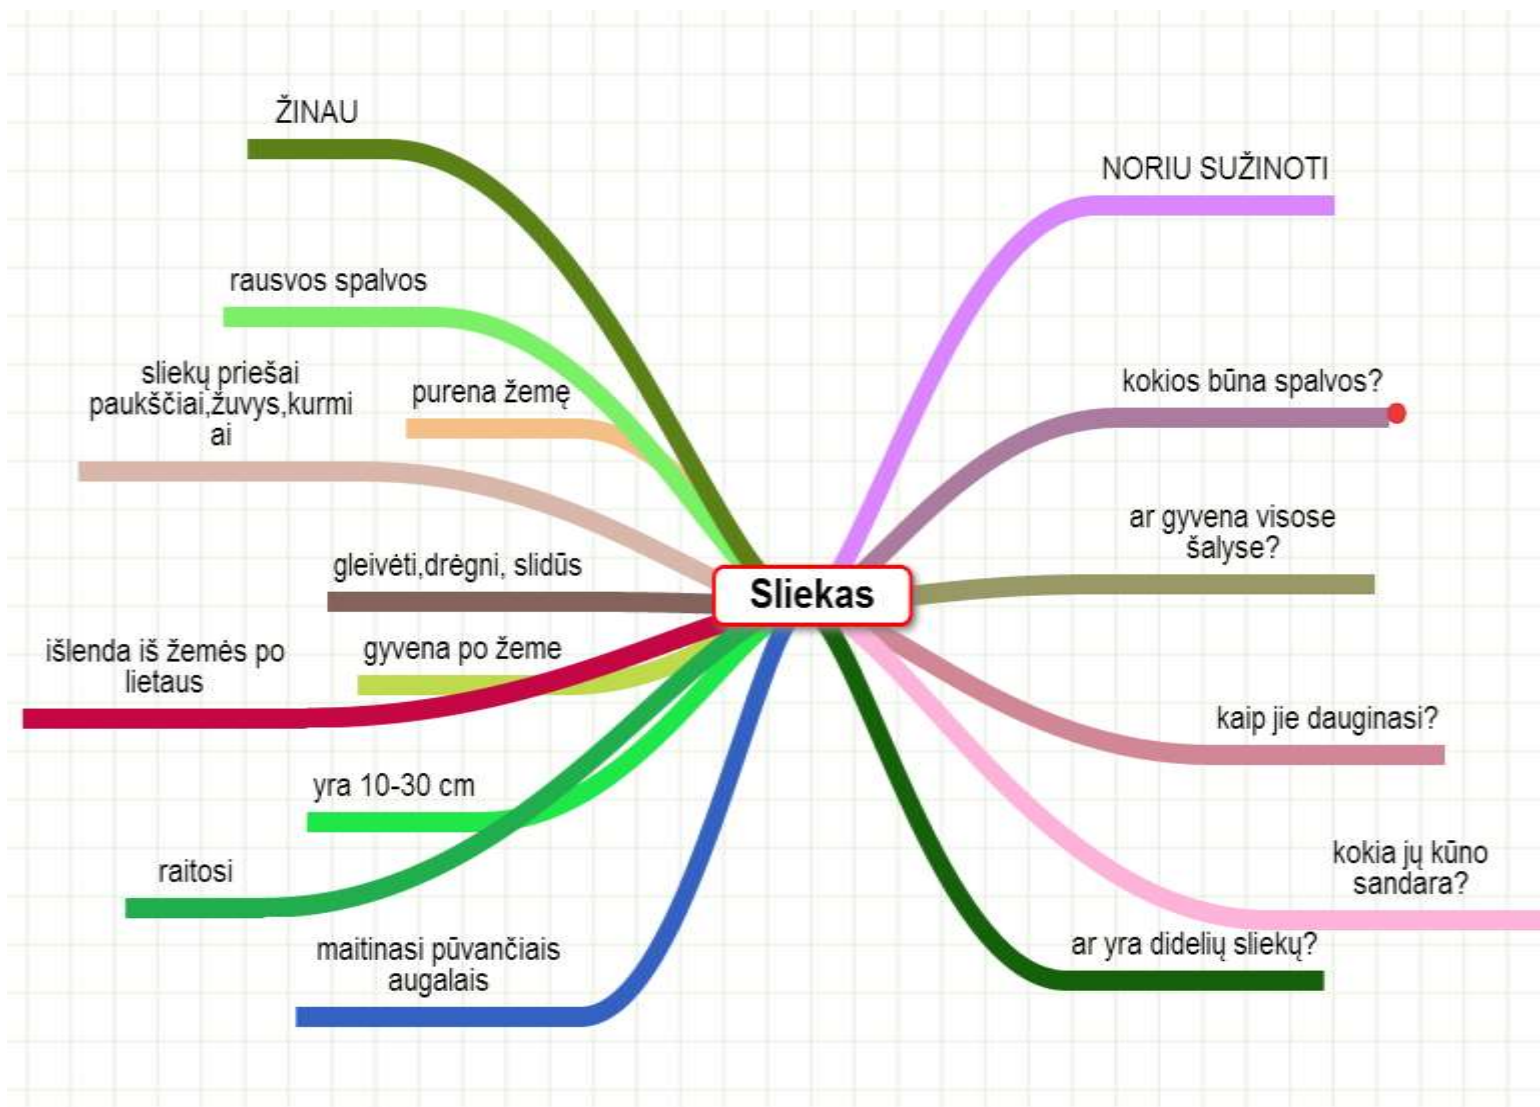

Students expose their works and complete the assigned tasks on the educational website <https://www.edmodo.com/>. This application provides students a great opportunity to bring their homework to the class and also to familiarize their parents with the work they do in the IT lessons.

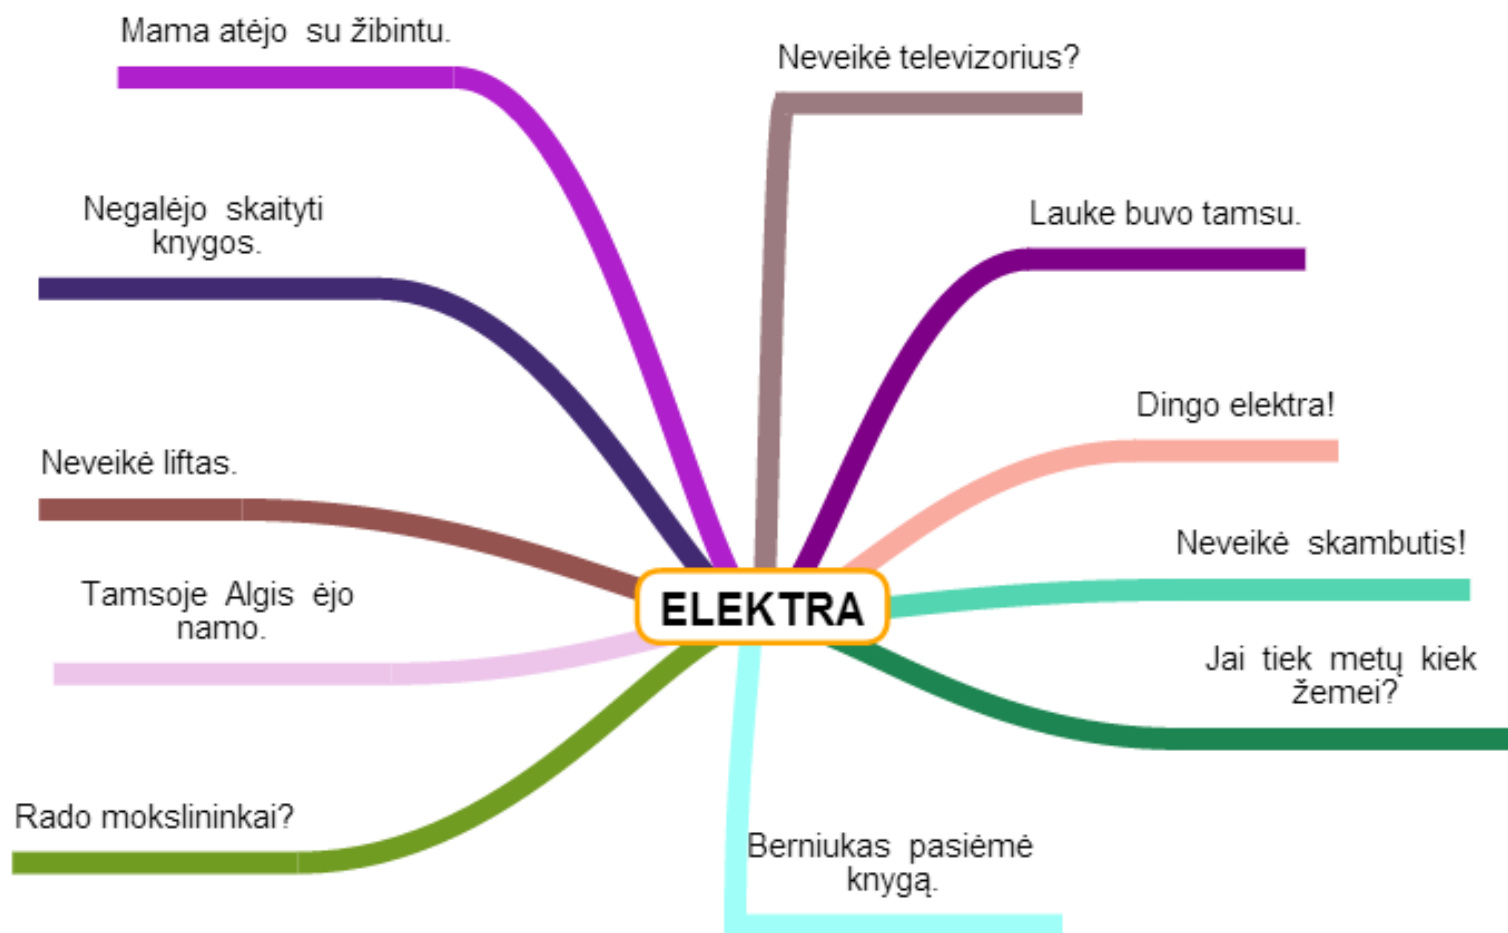

This year we've started using tablets in our class

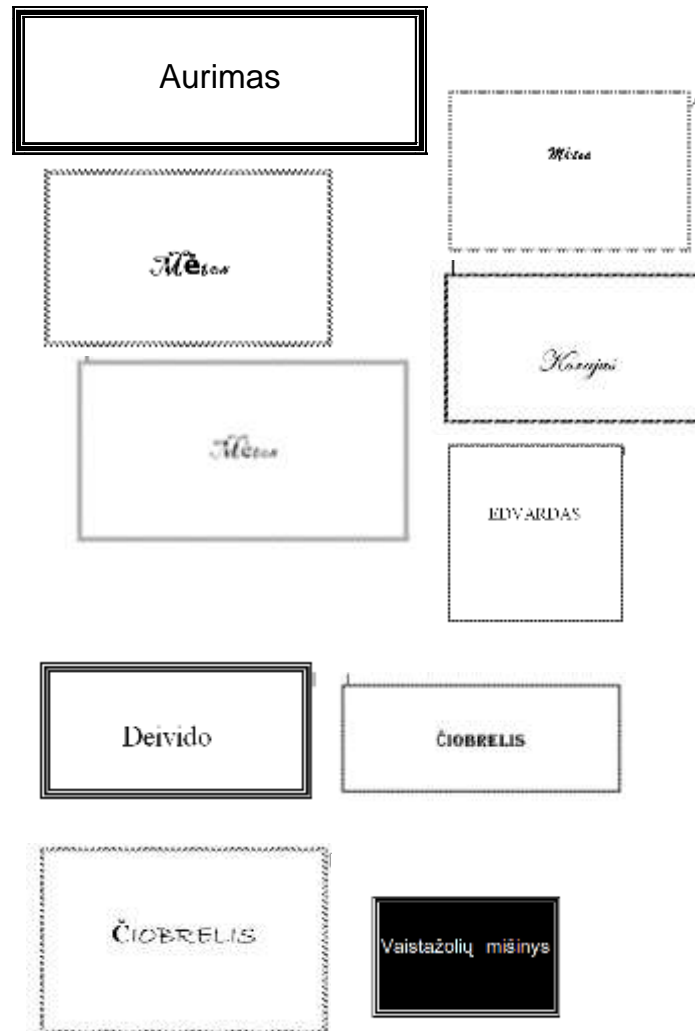

We use <http://drichard.org/mindmaps/> mind maps in the lessons for the text and topic analysis.

The second year students can choose IT basics as an extracurricular subject which is integrated with other subjects. Their first work – notes on the tea bags.

Sudents use <http://linoit.com/> to do the majority of creative works, text and topic analysis tasks.

Name presentation

Name presentation

Trumpa vardo reikšmė: min- (minėti) + daug- (daug) – „daugelio minimas, garsus“.

Mindaugas (g. apie 1200 m. – 1263 m. rugsėjo 12 d.) – Lietuvos didysis kunigaikštis (~1236-1253 m.), taip pat pirmasis Lietuvos karalius (1253-1263 m.).

Mindaugas

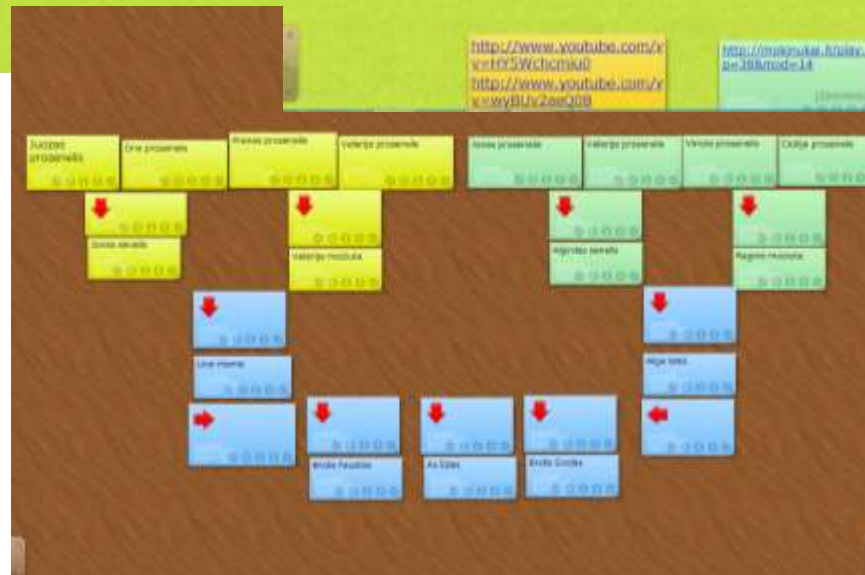

Visi sustojo ratu ir galvojo, koks vardas tiktų šiam žmogui. Taigi visi galvojo ir galvojo... Vieni vardai buvo per "menki", kiti šiaip nepatiko, o Mindauga "lupte prilipo". Taip mūsų šeimoje atsiradė išmintingas karalius Mindaugas.

What comes into a year?

What comes into a year?

sausis, gruodis, vasaris, vaikai, vaikai žaidė su sniegu, su rogutėmis, blizgėjo sniegas, kovas, balandis, gegužė, žaliuoja medžiai, žydi obelys, žaliuoja pievos, sniegas tirpo, žuveja, pjauna žolę, pjauna avis, rugėjis, kasa bulves, obuoliai prinoko, rugius pjauna, lapkr, birželis, liepa, rugpjūtis, maudės upėje, žuveja, pjauna žolę, Metai dvylika mėnesių.

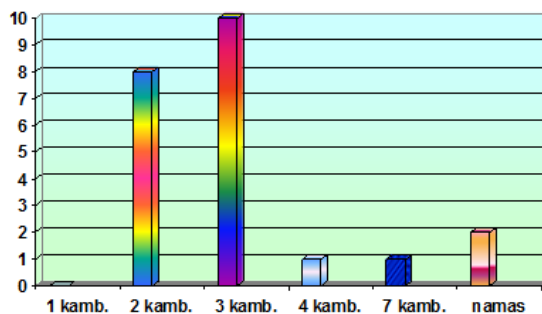

Family tree

Students accomplish tasks related to various subjects such as geography, biology and history, learn how to work with various applications, websites, charts, tables and online encyclopedias.

Gyvenama vieta

Perkamos prekės

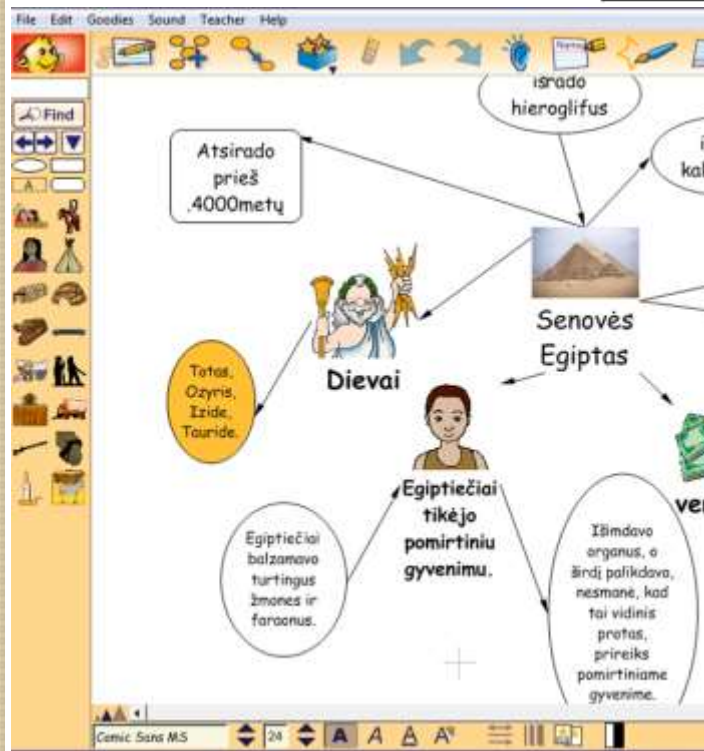

kiekis	kaina	suma
4kg	5Lt	20Lt
3kg	20Lt	60Lt
4kg	25Lt	100Lt

Kūno judėjimo

laikas	greitis	kelias
4h	5km per 1h	20km
3h	20km per 1km	60km
4h	25km per 1h	100km

pio
